SOLO
Group

Dear reader,

Since SOL'S was founded in 1991, ethics has been at the heart of SOLO Group teams' approach. With a view to respecting the environment as well as people, SOLO Group has always maintained fair and responsible relationships with all its contacts, factories, employees, service providers, clients and partners. SOLO Group has been a member of the FAIR WEAR Foundation since 2014 and of the ACCORD agreement since June 2020, two organisations that strive to improve working conditions in garment factories.

30 years later, in 2021, SOLO Group is pursuing this ambition by committing to more responsible trade through its program:

wear & care product, people, planet

At the heart of our commitments: our collections.

SOLO Group's brands have always stood for a timeless style and garments to wear at all ages and for all body shapes, which are never out of fashion. Clothes with an everlasting appeal as opposed to fast-fashion standards.

Moreover, we attach great importance to developing sustainable clothing. Quality is our north star as we believe that the best way to protect our planet is to guarantee products that will last over time.

All our organic cotton items are OCS or OCS 100 certified. For special requests, we produce GOTS certified garments.

Starting from 2021, we go one step further: all SOLO Group's new products will be solely made of organic cotton and/or recycled polyester. We do not claim to be perfect, but we strive to continuously improve and to keep our commitments.

From the design stage to the end of life of all our products, our teams are committed to always do their best to preserve the planet and its inhabitants.

Alain Milgrom
Chairman

Audélia Krief
CEO

A diverse group of people are celebrating at a city event. In the foreground, a man with a beard and red hair is carrying a woman with curly hair on his shoulders. Both are smiling broadly with their arms raised. Other people in the background are also smiling and raising their fists in a gesture of celebration. The scene is set in a city street with buildings and a red flag visible in the background.

wear & care people

« We do not claim to be perfect, but we strive to continuously improve and to keep our commitments. »

NUK, to fight against blindness in Bangladesh.

Established in 1991, Nari Uddug Kendra (NUK) is a non-governmental organisation whose mission is to promote gender equality, human rights and personal and political empowerment of women and girls in Bangladesh.

Since 2003, NUK has set up an eye care program and has enabled the creation of specialised and independent hospitals: the Kishoreganj Eye Hospital (KEH) and the Agaroshindur Sufia-Aftab Eye Hospital (ASAEH).

Their mission is to provide high quality eye care to the rural poor and to strive for the prevention and control of avoidable blindness in Bangladesh.

Sreepur Village, to offer a future to the neediest.

The «Sreepur Village, Bangladesh» is a charity that runs and funds a village providing a refuge for extremely disadvantaged, isolated mothers and children. In addition to providing safety, shelter, care and food, the organisation aims at enabling mothers to acquire a wide range of skills so that they can generate income and reintegrate into society, without being separated from their children.

National Debate Federation Bangladesh (NDF-BD), debate for education.

The NDF-BD is one of the largest debate associations in Bangladesh. It organises a large number of debates for students throughout the country. The main objective is to create social awareness among students on various social, political and economic issues through the practice of debate, which encourages listening, tolerance and understanding to manage conflicts.

Gustave Roussy embodies the hope of curing cancer before the end of the century.

Created in 2005, the Foundation aims to fund the research conducted at Gustave Roussy, leading cancer centre in Europe, while keeping at the heart of its actions the objective of improving patient care and quality of life.

Institut Pasteur, research in the service of medicine.

The Institut Pasteur, an internationally renowned biomedical research centre, brings together high-level teams to study numerous diseases that constitute public health problems in France and worldwide: cancers, infectious diseases, brain diseases, genetic diseases, etc. Its history is marked by major breakthroughs and the excellence of its researchers has been recognised on many occasions, especially by the award of 10 Nobel prizes in medicine.

Member of the FAIR WEAR FOUNDATION since 2014

The FAIR WEAR Foundation acts to improve labour conditions in garment factories, both upstream and downstream of production.

Joining more than 130 companies, SOLO Group has been a member of FAIR WEAR since 2014, thereby committing itself to ensuring that its partners respect the organisation's Code of Labour Practices. The Fair Wear Foundation audits factories to find out how well they comply with its Code of Labour Practices. More information on sologroup-paris.com

New! ACCORD on fire and building safety in Bangladesh

ACCORD is an independent agreement between brands and trade unions designed to build a safe and healthy Bangladeshi textile Industry. The engagement was signed on May 15th 2013. It was created to ensure a safe working environment where no worker has to fear fires, building collapses and other accidents.

SOLO Group joined ACCORD in June 2020, thus reinforcing its involvement and commitment with workers and factories in Bangladesh, who it has been partnering with for many years.

Equal profit sharing with employees

Since its foundation, SOLO Group has implemented equal profit-sharing among employees. Thus, all employees receive the same amount every year.

A hundred employees work in the headquarters located in rue Réaumur, in the centre of Paris, to ensure the success of SOLO Group: they are all guided by team spirit and by managers who encourage agility, involvement, internal development and commitment.

An aerial photograph of a dense mangrove forest. A winding river or canal cuts through the thick green canopy, reflecting the sky. The water is a deep teal color. The forest extends to the edges of the frame, with some small clearings and a boat visible on the right side.

wear & care planet

«From the design stage to the end of life of all our products, our teams are committed to always do their best to preserve the planet and its inhabitants.»

OEKO-TEX STANDARD 100

The OEKO-TEX label guarantees that garments do not contain any harmful substances. The entire collection of 100% cotton and cotton/polyester T-shirts and polo shirts of SOLO Group's brands is OEKO TEX certified.

Certification issued by IFTH

ORGANIC 100 CONTENT STANDARD

The Organic Content Standard (OCS) applies to any non-food product containing 95-100% organic material. It verifies the presence and amount of organic material in a final product and tracks the flow of the raw material from its source to the final product.

Certification issued by Control Union

ORGANIC BLENDED CONTENT STANDARD

The OCS (Organic Content Standard) applies to any non-food product containing 5-100% organic material. It verifies the presence and amount of organic material in a final product. Further OCS tracks the flow of a raw material from its source to the final product. This process is then certified by an accredited third party.

Certification issued by Control Union

GLOBAL ORGANIC TEXTILE STANDARD

The Global Organic Textile Standard (GOTS) ensures the organic status of textiles from the harvesting of the raw materials through environmentally and socially responsible manufacturing all the way to labelling.

The standard covers the processing, manufacturing, packaging, labelling, trading and distribution of all textiles made from at least 70% certified organic natural fibres.

GOTS certification upon request for special production.

Certification issued by Control Union

Recognised measurement tools

The Sustainable Apparel Coalition was founded in 2010 by two giants of the clothing industry in the United States, with the aim of improving market players' practises and creating reliable tools to measure the environmental impact of their products.

Among the big names in the textile industry, SOLO Group is the only French player in the promotional garment sector to have joined the SAC since 2015.

Virtuous logistics

The vast majority of the boxes used by our factories are made of recycled cardboard.

In our warehouse in Le Havre, all the picking boxes are made in France from recycled materials.

Our cardboard supplier is Imprim'Vert certified.

We recycle used boxes (suppliers' boxes).

Picking bags are made of recyclable material.

We use a polypropylene adhesive tape, which is less polluting than PVC.

Finally, in 2017 we equipped our 32,000 sq. m. warehouse with LEDs and installed an automatic detection system that has reduced our power consumption by more than 50%.

«Made in France» development

At SOLO Group, we strongly believe in the positive impact of local and solidarity economy.

In 2020, we took the challenge of giving birth to Atelier Textile Français to produce T-shirts and bags 100% made in France. Atelier Textile Français' employees have a passion for textile and the creation of our clothing workshop in the Vosges region gave them the opportunity to rediscover a job they used to love or to put into practice their initial training in a fashion-oriented Made in France company.

SOLO Group promotes a responsible approach. We are expanding our offering of locally produced promotional clothing while increasing our social commitment.

The Atelier Textile Français brand was born out of a meeting between Alain Milgrom and Thomas Bragard. The former, founder and President of SOL'S, is the expert in customisable textile products, whereas the latter, founder of ATELIER TB, is the expert in French manufacturing, who manufactures his products in France, in the workshops he has attended since he was a child. Atelier Textile Français is the first customisable garment brand that manufactures its products in France, in the Vosges region. Like all SOLO Group's brands, Atelier Textile Français promotes a responsible approach aimed at reducing our environmental impact and improving our social footprint. Atelier Textile Français is synonymous with quality clothes featuring comfortable and modern cuts, which are perfectly designed to be fully customised. All our T-shirts are "no label" and are made of materials suitable for all customisation techniques.

THE NUMBER ONE PRODUCT FOR DIRECT TO GARMENT DIGITAL PRINTING

The **FIRST** and only **ORGANIC COTTON** pretreated t-shirts, ready to be printed

RTP Apparel revolutionises the digital printing process by eliminating the pretreatment step, which is essential in regular process*.

PRODUCT QUALITY

- Forget fabric colour fading
- Clean printing surface
- No pretreatment visible for no halo effect
- Soft and quality handfeel

PRINTABILITY

- Superior printing performance
- Proven resistance to washing**

PRODUCTIVITY AND RESPONSIVENESS

- Time-saving
- Greater responsiveness to meet seasonal order peaks
- No more laborious pretreatment needed
- Focus on printing, forget about pretreatment
- Increase your printing machine profitability
- Print directly at the point of sale (during events, festivals, in shops, etc.)

DIGITAL PRINTING HAS NEVER BEEN SO EASY!

PICK. PRINT. CURE.

NEO BLU

PEOPLE IN MOTION

NEOBLU was born out of the desire to create a brand of work clothes that doesn't look like one, a brand for people on the move, to wear at work as well as outside of work. Inspired by the fact that even when we wear work clothes, we all want to have style, NEOBLU's ambition is to break the uniform codes by offering a collection directly inspired by retail so that every employee can feel as good at work as they do in their private life. The idea behind the brand is that clothes people wear are no longer a constraint but, on the contrary, a pleasure for everyone.
